SKYCORP
TECHNOLOGIES

PIONEERING THE FUTURE OF HYDROGEN DRONES

SKYCORP is engineered for industrial, emergency, and logistics missions where reliability and speed meet sustainability.

We deliver low-noise, low-impact aerial performance—supporting cleaner skies for emergency response, surveillance, and public safety.

Our drones deliver extended endurance (up to 120 minutes), ultra-fast refueling (2–5 minutes), and high payload capacity—all with zero emissions.

AUTONOMOUS SKIES™ - Building the world's first autonomous hydrogen drone ecosystem.
